PROFESSIONAL SUMMARY

B.Tech CSE (AI) graduate with hands-on experience in Java, Salesforce (Apex, LWC, SOQL, Flow Builder), Python, and web technologies. I have built projects including a Salesforce CRM for lead management, a Java-based Student Management System with ChatBot, and a Python/OpenCV Driver Drowsiness Detection System. I am looking to grow as a software engineer and would love to contribute to a team where I can keep learning.

EDUCATION

Bachelor of Technology - Computer Science (AI) Aggregate: 75.68% (Upto 7th sem) AKTU, Lucknow	2022-2026
Intermediate - Class XII Aggregate: 77.21% CBSE	2022
High School - Class X Aggregate: 70% CBSE	2020

TECHNICAL SKILLS

Programming Languages: Java, Apex, Javascript, Python, SQL

Salesforce Technologies: Apex, Lightning Web Component, SOQL, SOSL, Salesforce CLI, Developer Console, Workbench, Sales Cloud, Einstein GPT, Agentforce

Web Technologies: HTML5, CSS3, Bootstrap4

AI/ML: NumPy, Pandas, Dlib, Matplotlib, OpenCV

AI Tools: ChatGPT, Claude, Github Copilot

Java Concepts: Object-Oriented Programming, Collections Framework, Exception Handling, File Handling, Arrays & Strings

Developer Tools: VS Code, Salesforce Developer Console, Eclipse IDE, IntelliJ IDEA

PROJECTS

Customer Lead Tracker | Salesforce CRM | Apex, LWC, SOQL, Salesforce CLI Apr 2026 - May 2026

- Built a Salesforce CRM covering 3 business modules using Apex triggers, LWC, SOQL, and Flow Builder.
- Implemented data validation and business logic ensuring accurate and consistent lead information management.
- Developed interactive LWC features reducing manual data entry by 40%.
- Deployed across sandbox and production orgs via Salesforce CLI with zero post-deployment defects.

Drowsiness Detection System | Python, OpenCV, NumPy, Pandas, Matplotlib 2025 - 2026

- Built a real-time driver drowsiness detection system using 64 facial landmarks to monitor eye closure and trigger safety alerts.
- Achieved 95%+ eye-closure detection accuracy using 64-point dlib facial landmark model under varied lighting conditions.
- Reduced alert response latency to under 200ms through optimized frame processing and threshold tuning.
- Optimized video processing performance while collaborating in a 5-member Agile team.

Student Management System with ChatBot | Java, OOP, Collections Framework May 2026 - Jun 2026

- Developed a Java-based system managing 500+ student records across a modular multi-class architecture.
- Applied OOP with Collections Framework, Exception Handling, and File Handling for error-resilient data management.
- Integrated a Java chatbot reducing average student query resolution time by 60%.
- Designed scalable architecture supporting seamless addition of new modules without breaking existing functionality.

CERTIFICATIONS

- Oracle Java Foundations - Oracle
- Java Intermediate - Sololearn
- Salesforce Ranger Rank (109 Badges, 50,000 Points)
- Salesforce Agentblazer Champion Badge - Salesforce
- Complete Python Programming - Udemy
- Programming Fundamentals with Python - Infosys Springboard

AREAS OF INTEREST

- Software Engineering
- Salesforce / CRM Development
- Java Development
